

# Company Profile

Custom Sockets

## The Company

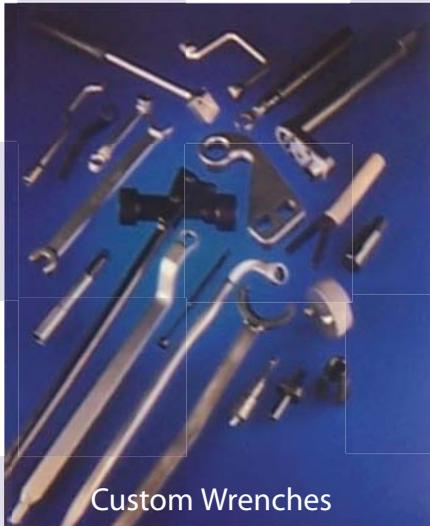

Since 1971 Lance Industries, LLC has been providing custom assembly tool solutions to the manufacturing industry, aero space industry and U.S. government. Many of its unique designs have become industry standards. Lance is now pleased to offer standard applications in addition to the full product mix of custom fastening tools it has become recognized for. The new, expanded product offerings will now allow Lance to be a single source assembly tool provider.

## The Process

We are proud to say that the process starts at our Royal Oak, Michigan manufacturing facility. The manufacturing process starts by using Chrome Vanadium Tool Steel to ensure that the products we create can provide long life under the harshest applications of industrial assembly. Every tool is precision machined and broached to exacting tolerances. The final product is then hardened to the proper Rockwell "C" scale. Quality control checks are performed through the manufacturing process and once again prior to final shipment.

From standard applications to complicated assembly procedures to simple nuts and bolts with clearance problems, we can assist you with problem solving, engineering and manufacturing capabilities.

Custom Wrenches

## Delivery

We understand the importance of providing you the right tool when you need it. Most items in this catalog can be manufactured and shipped in ten to fifteen business days if the item is not in stock.

Lance does offer LANCE ON DEMAND service that ensures the product will be in stock whenever you order it. There is no additional cost for this service. Here is how it works: During the initial ordering of an item, you will need to inform Lance that there will be additional usage of the product within the next twelve months. Lance will then increase the volume of the initial order inventorying the additional product at its Royal Oak, Michigan facility. Based on your forecast, Lance will inventory a safety stock to ensure future orders can be shipped the same day they are placed. We understand the importance of having the tool when you need it. That is why we have created this revolutionary process. Remember, LANCE ON DEMAND is only available from Lance Industries, LLC your single source for quality assembly tools

Product Applications

# Specialty Applications

Don't see what you need ? Give us a call, (248) 549-1968.  
Chances are we have made it or we can make it. Developing unique tooling solutions has been our core business since 1971.

On page 109 is an Express Quote form that will help gather the information we will need to properly design and develop the assembly tool your requesting. Complete the form and fax it to (248) 549-1960 and Lance will engineer a solution for your application.

Express Quote is also accessible on our web site [www.lancetools.com](http://www.lancetools.com)  
The form can be printed and faxed or sent electronically.

## Safety

- Always operate the tool as it was designed.
- Always wear safety glasses when using any tools.
- Always inspect the tool for damage before, during, and after operation.
- Always use the tool for manufactured purpose. Please do not modify.
